

RX 561

COMPACT ACRYLIC SILOXANE COATING

RX 561 is used as a top coat for decorating and protecting exterior façades.

The nature of the raw materials used in the formulation gives the surface a rustic appearance. RX 561 is used on lime-cement base coat render, on base coats reinforced with alkali-resistant fibreglass mesh and on the FASSATHERM external wall insulation system.

For further information and for correct use of the products, see the datasheets available on the website www.fassabortolo.com
